## WELCOME MESSAGE

While the Semantic Web vision and research continues to attract attention at many different conferences, the International Semantic Web Conference has firmly established itself as the primary venue for top-level research in this area. It is therefore with great pride that I welcome you all to this Third International Semantic Web Conference in Hiroshima, Japan. This third conference completes the Semantic Web's circumnavigation of the globe, following the first conference in Europe (Sardinia) and the second conference in America (Florida).

Although primarily established to be the top scientific conference in the field, it is very encouraging to see that this conference is much richer than just the set of accepted papers. In addition to the main conference tracks (more details on this in the preface of the proceedings), there are very active and well attended events for software demonstrations and poster presentations. In fact, both events have drawn so much interest that they will be spread over two sessions during the conference, in order to give sufficient space to all participants. Furthermore, the second Semantic Web Challenge has attracted almost double the number of submissions from last year. Thus, ISWC2004 promises to be a very lively and active event.

A tell-tale sign of the high visibility of this conference is that, in a time when other major conferences have a hard time attracting sponsorship, ISWC2004 can take pride in a prestigious set of sponsors.

Finally, among the many people that have contributed to the success of this conference, I will select a few for my warmest thanks: the Program Chairs Sheila McIlraith and Dimitris Plexousakis, who are responsible for the entire scientific content of the conference; and the Local Chair, Riichiro Mizoguchi. We are very fortunate with this conference to be in the good hands of such an excellent Local Chair, presiding over such an excellent team.

I am greatly looking forward to sharing this event with you all, and I hope you will learn as much from participating in it as I have from helping to organise it.

Frank van Harmelen.  
Conference Chair.
