

Installing the SimModel Ptolemy II demonstration

1. Extract *simmodel.zip* to a directory e.g. *c:\simmodel*
2. Open *ShoppingModel.html* in Internet Explorer
3. If you do not have a Java plugin installed, you will be presented with the following dialog box:

4. Select the **Yes** button to install the plugin. This may take some time – you should ensure that you are connected to a fast network before attempting this, as it downloads the packages from Sun.
5. Reload the *ShoppingModel.html* in the browser
6. You should see the applet appear in the browser, with the instructions below.
7. Press **F11** to view the demo in full screen mode. Pressing **F11** again will toggle back to the regular Internet Explorer view

Troubleshooting

1. The applet may not display – in this case, open the Internet Explorer preferences using menu **Tools -> Internet Options...** open the **Advanced** tab. Page down to the Java (Sun) section and ensure that the Java 2 plugin is being used for applets.
